

New victory for Matthieu Lussiana who increases his lead in Brazilian championship.

This race was a remake of previous event, this time with advantage for Matthieu in the very last turn.

After a pole position, a track record lap, Matthieu had to win.

He leads the race for 12 laps and was hampered by rider who was taking one lap and loses his gap of three seconds he had with Pierluigi. Rear tyre began to have less grip and he made two sliding; his rival took the opportunity to overtake Matthieu.

In last corner, Matthieu tries a slightly late braking and passes into a mouse hole in interior and Pierluigi didn't expect this.... Matthieu keeps until the finish line a small advantage of 37 milliseconds which ensures him victory and he came back Campo Grande with 28 points ahead of Pierluigi.

With this latest success Matthieu leads again BMW Motorrad Race Trophy in front of Roland Resch and Markus Reitenberger.
