

Moto 1000 GP: Goiania

After Jerez heat that of Goïanoa in Brazil

All riders and teams of the Brazilian Championship had to face torrid heat throughout the weekend. More than 40 ° in paddock and 66 ° for track ...

Free sessions are rather good ; however heating brakes problems brakes have affected Matthieu. He has succeeded in dominating his main rival of 8/10 seconds in qualifying 1 but lost pole position for 4/10 of second.

On Sunday, he misses his start because of clutch remains adhered a few moments and he was only seventh at first corner. It takes a few laps to go back to third position behind Miguel Praia but Matthieu makes a straight ..no more brakes again. He doesn't lose too much time and managed to rise in second position not far from Pierluigi

Unfortunately, it missed a few laps to do junction and hope for a new victory that returns this time to Diego Pierluigi, decidedly very comfortable on this track where he already won third event of the Championship
